Limestone Charred Oak

4 size project pack 20.93m<sup>2</sup>

Length mm	Width mm	No. Slabs
900	600	17
600	600	17
600	295	18
295	295	19

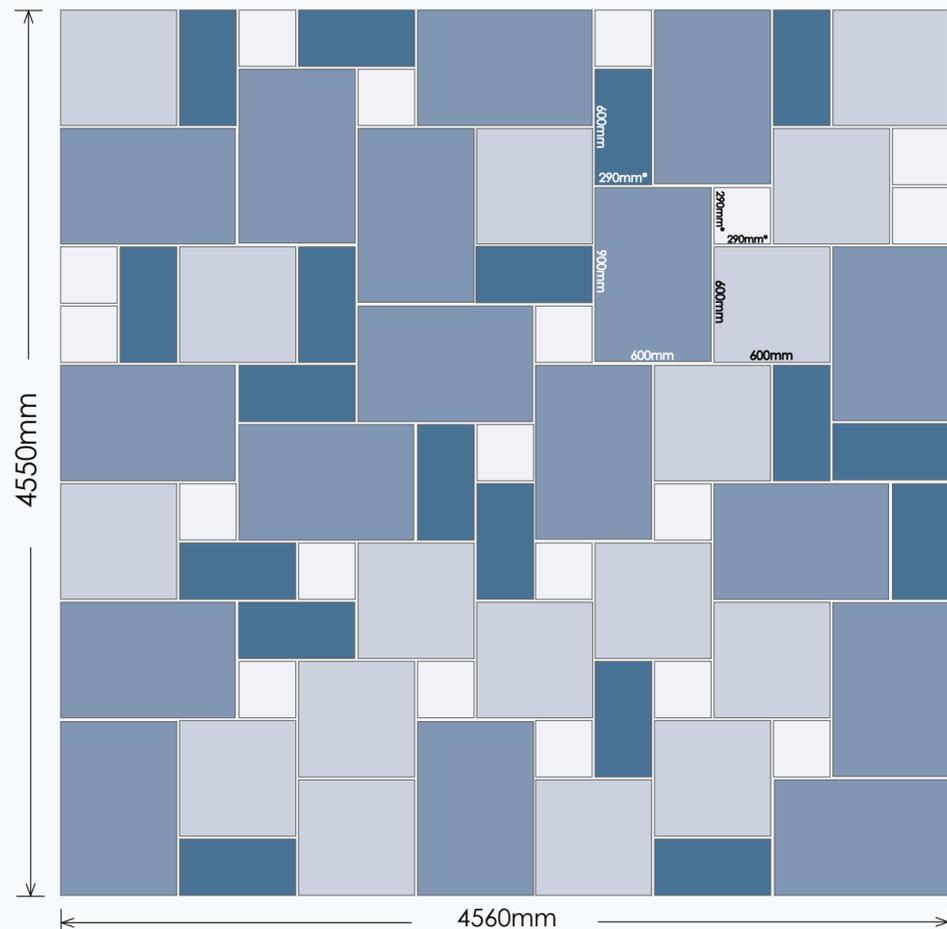

Charred Oak is uncalibrated - natural split at 15 - 22mm +/-

Please note that Charred Oak will lighten as a result of natural weathering which is normal for this product.

Some minor delaminating may happen at the early stage of installation - this is normal with sandstone and the durability of the slabs will not be affected. As per all of our products, we strongly suggest that an SBR bonding agent should be applied to the back of each slab immediately before laying, and products should be laid on a full bed of mortar. Always mix slabs (whilst laying) when using multiple packs in order to achieve an overall blended appearance.

For detailed laying instructions as well as our full terms and conditions, please visit our website at [www.digbystone.com](http://www.digbystone.com).

Always work in a safe manner in accordance with current health and safety legislation. For advice, telephone 0300 003 1747 or visit [www.hse.gov.uk](http://www.hse.gov.uk)

### Flag sizes:

17 at 900x600mm  
17 at 600x600mm  
18 at 600x290mm\*  
19 at 290x290mm\*

All sizes are nominal.

\*Charred Oak measures at 600x295mm and 295x295mm respectively as this is a sawn product. Therefore, the pack size is slightly larger at 20.93m<sup>2</sup>.

Laying guidelines are available on our website - see our Maintenance and Laying guide at [www.digbystone.com/maintenance-and-laying-guides](http://www.digbystone.com/maintenance-and-laying-guides)

**PLEASE NOTE:** No brick acids should ever be used on any natural stone products. Always check the suitability of ANY cleaning solution with the manufacturer prior to use.
